Core Pro RM

19" server rack cabinets

With supported compatibility for your next technology

The new Core Pro RM Series is specially designed for those who want to challenge the boundaries with style. The products in the series have a simple but highly flexible design. These products are optimized to deliver maximum performance within the smallest possible form factor. In short, a chassis design for true professionals.

Core Pro RM is compact and performance-optimized 19" rack compliant modules.

The modular design of the Core Pro RM series enables unique and custom configurations. This gives the possibility of very high performance in relation to the form factor. Due to its short installation depth of only 335mm (425mm incl. cable protective frame), it is optimized for applications in industrial and data center environments.

The modular design makes the products dynamic and easy to customize, even in smaller quantities. This means that the Core Pro RM series is an excellent choice for, among other things, measuring, process or safety technical equipment.

Thermal Management

Smart and active air-flow design in high performance systems with up to X3 fan boost

Managing waste heat in fan-less to high-performance components or systems

Advanced thermal solutions, include high-performance heat pipes, passive heat, and active pumped liquid cooling technologies is available with the support of our expertise.

Our specialist is available to support your project even with small quantities or prototypes.

Core Pro Fan Boost add-on is used to optimize component cooling to preserve long-life system environments. In arrangement with challenging thermic elements or in crucial infrastructures Core Pro Fan Boost add-on is used as a redundant cooling unit to ensure and sustain a healthy climate.

Exploded assembly of X3 Fan Boost

- Fan Boost x1** Art no. TQ-CORE-(IU-4U)-FBX1
- Fan Boost x2** Art no. TQ-CORE-(IU-4U)-FBX2
- Fan Boost x3** Art no. TQ-CORE-(IU-4U)-FBX3

Core Pro Fan Boost add-on unit have a reliable design, it's easy to access and easy maintain. All spare parts have an long-lasting world wide availability.

Styling and available customization

Types, sizes and dimensions

Core Pro RM 1U

The modular design concept of the 19" rackmount Core Pro RM 1U allows building a large variety of customized versions. Changes in the mechanical structure and various hardware options are available even in small quantities to fit all technologies.

Available versions:

Standard (Art no. TQ-CORE-1U-IPC1)

Fan-less (Art no. TQ-CORE-1U-FL1)

Military Server (MIL-STD-810)

Art no. TQ-CORE-1U-STD810

Core Pro RM IPC 2U

The modular design concept of the 19" rackmount Core Pro RM 2U allows building a large variety of customized versions. Changes in the mechanical structure and various hardware options are available even in small quantities to fit all technologies.

Available versions:

Standard (Art no. TQ-CORE-2U-IPC1)

Fan-less (Art no. TQ-CORE-2U-FL1)

Military Server (MIL-STD-810)

Art no. TQ-CORE-2U-STD810

Core Pro RM 3U

The modular design concept of the 19" rackmount Core Pro RM 3U allows building a large variety of customized versions. Changes in the mechanical structure and various hardware options are available even in small quantities to fit all technologies.

Available versions:

Standard (Art no. TQ-CORE-3U-IPC1)

Fan-less (Art no. TQ-CORE-3U-FL1)

Military Server (MIL-STD-810)

Art no. TQ-CORE-3U-STD810

Core Pro RM 4U

The modular design concept of the 19" rackmount Core Pro RM 4U allows building a large variety of customized versions. Changes in the mechanical structure and various hardware options are available even in small quantities to fit all technologies.

Available versions:

Standard (Art no. TQ-CORE-4U-IPC1)

Fan-less (Art no. TQ-CORE-4U-FL1)

Military Server (MIL-STD-810)

Art no. TQ-CORE-4U-STD810

TECKNIQ™

Designing simplicity, adding confidence, providing reliance

TECKNIQ™ develops and manufactures products with a distinct Scandinavian design. By putting quality and attention to detail at the forefront is what has ultimately paved the way for our success.
